

Footstool bed.

Hidden convenience, versatile and functional.

Footstool bed.

JAY-BE
Sleep Smart

The perfect hybrid of functionality, style, and convenience.

Offering understated charm, our footstool bed seamlessly blends into any living space while discreetly providing the convenience of a hidden bed within. With a diverse range of fabric options to choose from, you can personalise this versatile piece of furniture to complement your interior design. Effortlessly transition from a chic footrest to a convenient bed whenever the need arises.

Crafted with an FSC-certified wood frame and featuring materials from recycled sources, the Jay-Be Footstool Bed delivers high-quality functionality, while ensuring eco-conscious design.

Where function meets design.

We do the science, so you can do the sleep.

Functionality meets Comfort, Health and Sustainability.

Everyday Comfort, Instant Bed: Effortlessly transform our footstool into a comfortable bed in seconds for your guests. Thoughtfully **crafted in the UK with an FSC-certified wood frame, GreenFR® fabrics, and ethically sourced materials**, our Footstool Bed seamlessly combines universal style, convenience, and eco-conscious design.

- > Ethically sourced materials.
- > Luxurious GreenFR® fabrics.
- > A comfortable bed in seconds.
- > Quilted topped e-Fibre mattress.
- > Sprung platform bed base system.
- > FSC® certified wood frame.
- > 5 Year Frame Guarantee.
- > Hand made in the UK.

Comfort.

Every material has been thoughtfully selected to guarantee both durability and comfort. Premium fabrics and a fibre-wrapped cushion make for a comfortable footstool, while the deep-quilted e-Fibre mattress ensures comfort when used as a bed.

SOFA:

- > Fibre-wrapped seat fillings for extra cosiness.
- > Soft to touch luxurious fabrics.

BED:

- > Super soft knitted fabric for extra cosiness.
- > Eco award-winning Advance e-Fibre for extra fine luxury comfort.
- > Breathable Rebound e-Fibre core comfort layer.

A bed in seconds.
Traditional fold-out mechanism.

Health.

Prioritising your health and well-being.

We understand that when you choose a bed, you seek assurance not only in the quality of materials, but also in their contribution to a healthy lifestyle. Therefore, we have carefully considered each material, from the mattress fillings to the fire-resistant treatment applied to our fabrics, ensuring that each contributes to a health-conscious experience.

GreenFR® protection on upholstery:

Flammability resistance without the nasty chemicals. GreenFR® is non-toxic, non-chlorinated, and non-carcinogenic. It is free from: halogens, heavy metals, antimony, Organophosphate, fluorocarbon, bio-accumulative chemicals, and bromine. In contrast, the bromine used in standard FR coatings, which has been employed for years, is known to contain antimony trioxide, which can pose health risks.

Natural FR protection on mattress:

When additional FR protection is required on the mattress, we have used a natural salt-based FR treatment which goes beyond simply conforming to the statutory REACH regulations.

OEKO-TEX™ STANDARD 100 Certified:

Fabrics meet the strict requirements of the internationally recognised OEKO-TEX® standard, class 1, so you can be sure that no chemicals are present that would pose a health risk.

Free from harmful chemical emissions:

The materials used in the mattress are 100% foam free and have been thoughtfully chosen to ensure they are free from any volatile organic compounds (VOC) chemical emissions.

Breathable e-Fibre™ comfort layers:

The comfort layers in the mattress have been selected to allow efficient airflow through the mattress, helping to keep it fresh for the long term.

Hypoallergenic materials:

The materials have been chosen to minimise the potential for allergenic triggers by creating an environment that is naturally resistant to dust mites, mould, and mildew.

Sustainability.

Award-winning and industry leading sustainability

At Jay-Be, we embrace a culture of sustainability and eco-conscious design practices throughout our business. To that end, each of our beds is meticulously crafted using thoughtfully chosen and ethically sourced materials. Moreover, our products are designed and engineered for longevity, providing you with further assurance of premium quality. What's more, our mattresses are 100% recyclable at the end of their useful life, enabling you to take an active role in protecting our planet and combating climate change.

FSC® certified wood:

We only used Forest Stewardship Council (FSC) certified wood which is sustainably sourced and promotes responsible forestry practices that consider environmental, social, and economic aspects to ensure long-term forest health and biodiversity.

100% Recyclable mattress:

All components in Jay-Be sofa bed mattresses have been thoughtfully chosen to offer comfort, as well as ensuring the mattress can be easily recycled at the end of its useful life.

GreenFR® fabrics:

The GreenFR® fire resistant treatment used on Jay-Be upholstery fabrics meets the requirement of ZDHC (Zero Discharge of Hazardous Chemicals) to wastewater and the environment.

Zero to landfill manufacturer:

Jay-Be is an independently audited and certified zero to landfill manufacturer, so you can be sure that all waste from our manufacturing processes is recycled or used for energy and does not go into landfill.

Oeko-Tex® Eco Passport certification:

Our upholstery fabrics carry the Oeko-Tex® Eco Passport certification which is a multi-step process by which manufacturers of textiles can transparently confirm that their products meet the criteria for environmentally responsible textile production.

Sustainably made in the UK:

Jay-Be is an ISO14001 registered manufacturer demonstrating continuous commitment to employing environmental practices. All mattresses are made in the UK, using local suppliers wherever possible to reduce transport and carbon emissions.

Proud to be recognised by the National Bed Federation as Bed Manufacturer of the Year 2023-2024.

Certificate No: 344072021
